DETAILED ACTION

This is the first Office Action for the serial number 09/856,407, PLANT ARRANGEMENT WITH A HOLDER FOR OBJECTS THEREIN, filed on 10/25/01.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent # 4,978,019 to Maroudas et al. in view of US Patent # 6,244,554 to Baker.

Maroudas et al. teaches a support (10) comprising at least three bendable rods (12) firmly bundled together circularly at one end at a common supporting base (26) and at least one fastener (22) for inserting one of the supporting rods therein.

Maroudas et al. teaches all elements above but fails to teach the support having an adhesive surface. Baker teaches the adhesive surface (53). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added adhesive surface to Maroudas et al.'s support to provide additional support for retaining an object within the rods and base. The supporting rods form a bundle of supporting rods in round in a hexagonal symmetrical arrangement in cross-section.

Art Unit: 3632

Allowable Subject Matter

Claims 16-25 are allowed.

In regard to claims 16-19, 23 and 25, the prior art fails to teach wherein the support is integrated within the bouquet and clasped in the bundle of floral stems. In regards to claim 20, the prior art fails to teach the supporting rod is insertable in two different directions into the fastener. In regards to claim 24, the prior art fails to teach wherein prior to individually bending, the support as desired a shiftable ring is shifted to a desired level.

Response to Arguments

Applicant's arguments with respect to claims 27-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alfred Joseph Wujciak III whose telephone number is (703) 306-5994. The examiner can normally be reached on 8am-4:30pm.
